

Arqit announces QuantumCloud™ powered by AWS

London, UK – 9th December 2022 – Arqit (Nasdaq: ARQQ, ARQQW) (“Arqit”), a leader in quantum-safe encryption, announces the application of Arqit’s QuantumCloud™ on Amazon Simple Storage Service (Amazon S3), powered by Amazon Web Services (AWS).

Amazon S3 is an object storage service used by millions of customers of all sizes and industries that offers industry-leading availability, security, and performance, and virtually unlimited scalability. Today, Amazon S3 contains more than 200 trillion objects and averages over 100 million requests per second.

Arqit’s QuantumCloud™ is a cloud-based symmetric key agreement software platform designed to deliver encryption that is flexible, lightweight, and quantum safe.

This announcement follows the deployment of Arqit’s QuantumCloud™ on AWS. Now QuantumCloud™ will be available as a redundant encryption service to AWS customers, and to enable product development with Arqit’s customers (such as Traxpay).

Commenting, **David Williams, Arqit Founder, Chairman and CEO said**, “By working with AWS, the world’s most comprehensive and broadly adopted cloud services provider, we will be able to make available our product to a large audience of customers. Amazon S3 is an incredible tool powering digital transformation for so many organisations globally. Arqit’s QuantumCloud™ integration with Amazon S3 offers a powerful opportunity for mass market availability of our product. We are proud to enable such a large cohort of customers to potentially realise quantum safety on the leading secure cloud.”

An example of Arqit’s customers using the service is Traxpay:

Traxpay MD Markets & Sales, Markus Wohlgeschaffen, said: “Arqit’s technology, enabled by AWS cloud services, is highly compatible with our supply chain finance ecosystem and uniquely capable of delivering clearly identifiable, quantum-safe digital finance instruments which are urgently needed in the digital trade era. We are now able to create new products for our customers that allow an unrivalled level of flexibility in liquidity management, efficiency, transaction speed, cost reduction and, most importantly, the highest levels of security.”

“As the safest and most trusted cloud provider, AWS deeply understands our customers’ data security needs. We are honored to support Arqit’s QuantumCloud™ solution, which leverages AWS’s deep set of cloud security tools and compliance features,” **said Clint Crosier, Director of AWS Aerospace and Satellite.**

About Arqit

Arqit supplies a unique quantum safe encryption Platform-as-a-Service which makes the communications links or data at rest of any networked device or cloud machine secure against current and future forms of attack – even from a quantum computer. Arqit's product, QuantumCloud™, enables any device to download a lightweight software agent, which can create encryption keys in partnership with any number of other devices. The keys are computationally secure, optionally one-time use and zero trust. QuantumCloud™ can create limitless volumes of keys in limitless group sizes and can regulate the secure entrance and exit of a device in a group. Arqit believes it is the only company in the market to have achieved Independent Assurance Review of its Security Proof demonstrating that the software can produce encryption keys which are zero trust and provably secure, i.e. permanently safe against attack from even a full scale quantum computer. This review was conducted by the GCHQ Accredited Centre of Excellence in Cyber Security at the University of Surrey. The addressable market for QuantumCloud™ is every connected device. Arqit was recently awarded the Innovation in Cyber award at the UK National Cyber Awards and Cyber Security Software Company of the Year Award at the UK Cyber Security Awards.

About Amazon Web Services (AWS)

For over 15 years, Amazon Web Services has been the world's most comprehensive and broadly adopted cloud offering. AWS has been continually expanding its services to support virtually any cloud workload, and it now has more than 200 fully featured services for compute, storage, databases, networking, analytics, machine learning and artificial intelligence (AI), Internet of Things (IoT), mobile, security, hybrid, virtual and augmented reality (VR and AR), media, and application development, deployment, and management from 87 Availability Zones within 27 geographic regions, with announced plans for 21 more Availability Zones and seven more AWS Regions in Australia, Canada, India, Israel, New Zealand, Spain, and Switzerland. Millions of customers—including the fastest-growing startups, largest enterprises, and leading government agencies—trust AWS to power their infrastructure, become more agile, and lower costs. About Traxpay

Traxpay is a fast-growing Internet platform that operates globally from Europe with a multibank approach. With the mission to become the “360° Supply Chain Finance Platform of Choice” for buyers, suppliers and banks, Traxpay offers all stakeholders a steadily growing, intuitively usable and sustainable set of tools for generating and securing liquidity along the entire value chain. In addition, platform users can financially incentivize the sustainability of their supply chains. Established financial institutions such as Deutsche Bank, DZ Bank, Nord/LB, LBBW or KfW IPEX-Bank trust Traxpay's financing solution and maintain strategic partnerships with the company.

Caution About Forward-Looking Statements

This communication includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical facts, may be forward-looking statements. These forward-looking statements are based on Arqit's expectations and beliefs concerning future events and involve risks and uncertainties that may cause actual results to differ materially from current expectations. These factors are difficult to predict accurately and may be beyond Arqit's control. Forward-looking statements in this communication or elsewhere speak only as of the date made. New uncertainties and risks arise from time to time, and it is impossible for Arqit to predict these events or how they may affect it. Except as required by law, Arqit does not have any duty to, and does not intend to, update or revise the forward-looking statements in this communication or elsewhere after the date this communication is issued. In light of these risks and uncertainties, investors should keep in mind that results, events or developments discussed in any forward-looking statement made in this communication may not occur. Uncertainties and risk factors that could affect Arqit's future performance and cause results to differ from the forward-looking statements in this release include, but are not limited to: (i) the outcome of any legal proceedings that may be instituted against the Arqit related to the business combination, (ii) the ability to maintain the listing of Arqit's securities on a national securities exchange, (iii) changes in the competitive and regulated industries in which Arqit operates, variations in operating performance across competitors and changes in laws and regulations affecting Arqit's business, (iv) the ability to implement business plans, forecasts, and other expectations, and identify and realise additional opportunities, (v) the potential inability of Arqit to convert its pipeline into contracts or orders in backlog into revenue, (vi) the potential inability of Arqit to successfully deliver its operational technology which is still in development, (vii) the risk of interruption or failure of Arqit's information technology and communications system, (viii) the enforceability of Arqit's intellectual property, and (ix) other risks and uncertainties set forth in the sections entitled "Risk Factors" and "Cautionary Note Regarding Forward-Looking Statements" in Arqit's annual report on Form 20-F (the "Form 20-F"), filed with the U.S. Securities and Exchange Commission (the "SEC") on December 16, 2021 and in subsequent filings with the SEC. While the list of factors discussed above and in the Form 20-F and other SEC filings are considered representative, no such list should be considered to be a complete statement of all potential risks and uncertainties. Unlisted factors may present significant additional obstacles to the realisation of forward-looking statements.
